EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Whitham (Reg. No., 32,635) on August 8, 2006.

The application has been amended as follows:

Please amend claim 6 as follow:

Line 2-4 delete ", which electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data"

Line 6 after "image data" insert - -, wherein the electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data - -

Please amend claim 16 as follow:

Line 2-4 delete ", which electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data"

Line 6 after "image data" insert - -, wherein the electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data - -

Please amend claim 22 as follow:

Line 3-5 delete ", which electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data"

Line 9 after "electronic watermark" insert - -, wherein said electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data - -

Please amend claim 23 as follow:

Line 2-4 delete ", which electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data"

Line 9 after "electronic watermark" insert - -, wherein said electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data - -

Response to Arguments

2. Applicant's arguments, see Remarks on pages 6-9, filed on July 19, 2006 have been fully considered and are persuasive. The rejection has been withdrawn.

Allowable Subject Matter

- 3. Claims 6-10, 16-20 and 22-24 are allowed and re-numbered from 1-13.
- 4. The following is an examiner's statement of reasons for allowance:

The instant invention defines a method for, a computer-readable recording medium, and a device that detects an electronic watermark from an original/compressed image. The claimed invention distinguishes over the prior art by the manner in which the electronic watermark includes the information.

The claimed combination allows for improving a method of detecting an electronic watermark from an image.

Detecting watermark from an image is conventional in the art. However, the prior art of record fails to teach a circuit which reads said compressed original image data, wherein the electronic watermark includes information consisting of first bits defined as CCI (copy protection) bits, second bits defined as reserved and third bits as undefined bit-data; a circuit which decodes said compressed original image to produce a decoded data; a circuit which performs inverse discrete cosine transformation (IDCT) for said decoded data; a circuit which detects electronic watermark data embedded in data for which IDCT has been performed along with the value of said bit-data for which is defined a plurality of instructions; a table file including one of said instruction for said value of said bit-data; and a circuit which performs a processing according to said instruction in said table file. These elements in combination with all of the other elements of the claims are not taught or fairly suggested in the prior art of record. The dependent claims 7-10, 17-20 and 24 are allowed for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shefali D. Patel whose telephone number is 571-272-7396. The examiner can normally be reached on M-F 8:00am - 5:00pm (First Friday Off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jingge Wu can be reached on (571) 272-7429. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
